We'll be there!

Company, hall, booth, ticket code, activities

Blechexpo/Schweisstec is a leading international trade fair for sheet metal working and joining technology. All industry players come together here from all over the world. With creative innovations and key future technologies, new standards are being set here in the fields of automation, modernisation of peripheral equipment, parts quality, scrap avoidance, process improvement, energy saving and employee safety.

The metal and sheet metal processing industry offers attractive career opportunities – from technical design to production and quality assurance. Work-study programmes, apprenticeships and internships open up numerous entry opportunities. Furthermore, the industry also contributes to important social functions, because metals and metal products are essential for infrastructure, machinery manufacturing, transport and energy. **#bepartofthebest**
